available on the market are power-split hybrid vehicles with a single planetary gear (PG), including the popular Toyota Prius and Chevy Volt. Although both vehicles use a single PG, they have different configurations with different number of operating modes. The Prius has no clutch and has a single operating mode, whereas

When you place the Prius in Park after "stealth" driving, the engine may startup. This is just simple process needed to insure the engine optimally tuned. If you don't want to wait the 10 to 20 seconds for engine shut off, you may immediately do it yourself. The hybrid system will just perform that "housekeeping" when you startup later.
